Compliance
& Fleet MGMT

SkyFleet offers the most comprehensive solution for drone users to not only manage fleet maintenance & operations, but also proactively enforce measures to ensure maximum safety and regulatory compliance.

Compliance Enforcement
Create and enforce custom pre- & post-flight checklists to establish the safest drone operation SOPs across entire fleet.

Hardware Maintenance
Automatically schedule, track & flag required maintenance for all hardware components used:
- Drones
- Batteries
- Payloads & Accessories

Pilot Certification & Training
Monitor individual pilot certification status and notify users of upcoming training & expirations.

Reporting
Generate recurring reports to provide compliance stakeholders total visibility into the safety, compliance and operation of a drone program.

Ease of Use

End-to-End Solution
Seamlessly integrate compliance management into the entire data capture workflow without additional manual steps.

Automate Workflows
Automatically create flight records and generate compliance reports from drone operations.

Validate Airworthiness
Prevent out of compliance hardware & pilots from performing missions by automatically validating the airworthiness of the entire platform before each flight.

Adaptable

Checklists
Create and distribute custom pre- & post-flight checklists based drone type and location specific needs.

Regulation Enforcement
Enforce & manage compliance for any government or enterprise regulation.

Drone Agnostic
Support a variety of drone platforms to ensure fleet wide compliance.

Scalable

Limit Operational Downtime
Prevent hardware & pilot downtime by automatically scheduling maintenance and certification updates.

Incident Prevention
Ground out of compliance hardware & pilots to ensure safe operations.

Investigations
Track incidents throughout the entire investigation process.
